2. php bin/magento setup:upgrade
3. php bin/magento setup:di:compile
4. php bin/magento setup:static-content:deploy -f

# 👉 How Image clean works ?

❖ When we delete a product or category image, it is removed from the database but remains in the folder. This continues to consume server storage, and over time, the server can become full due to unused product and category images. The Image Clean module helps to remove these unused images, freeing up valuable server space.

❖ When you delete category images, they will appear in the Category Image Clean grid. To access the Category Image Clean grid, follow the steps below:

❖ Catalog >> Category Image Clean

# 👉 **Output:**

⚠ One or more **indexers are invalid**. Make sure your **Magento cron job** is running.                    System Messages: 1 ▾
